Time: Time at which each vehicle arrived or left (To the nearest 5min).
Example: collect the data in between 8:05am to 8:10am but enter the time as 8:10am

Direction: use '**IN'** for arriving traffic and use '**OUT'** for leaving traffic. Circle the one which you collect.

Type: just use '✔' to tick the type of vehicle in the given boxes.

Occupancy: just write the number of people in the vehicle except for buses, use the percentage as it is impossible to count the number of passengers in it.
Example:1,2, 3…. for all vehicles
        5%,10%.... for buses
(Percentage to number of people can be converted using this conversion = X% of 87, where X is the percentage, you enter& 87 is total capacity of bus.)

Blinkers/Hand gestures: if any of Blinkers/Hand gestures used just tick '✔' in the given box otherwise use '✗'.

Electric or not: Tick '✔' if its electric other wise use '✗'.
